

Activate cost saving and dormant liquidity

Consolidation plays a crucial role in the success of digital transformation across your supply chain. Visibility across your spend and AP data will enable you to streamline operations, enhance collaboration, optimise costs, mitigate risk and foster true innovation.

The power of RobobAI is that it genuinely offers a single source of truth across your supply chain.

Through a simple process of data ingestion, we morph disparate data into rich visualisations that instantly gift you clarity to see high level spend patterns with the ability to drill into the detail of untapped opportunities to active cost savings and release dormant liquidity.

Scale inline with your business needs

With your classified spend data at the core, you can take advantage of a plethora of supply chain management tools at any time. These include:

- Spend Visibility
- Payment Analytics
- Third Party Risk Management
- Vendor Compliance
- Procurement Management
- Payment Optimisation
- Contract Management

Centralising your supply chain management function on RobobAI's AI driven platform will inherently improve the quality of financial insights you can draw from the AI's continual analysis and optimisation of large volumes data, empowering finance and procurement leaders to make astute decisions quickly.
